Career Objective

Highly skilled Front-End Developer with strong skills in HTML, CSS, JavaScript, and Tailwind CSS, and solid experience building clean, responsive, and user-friendly interfaces. Familiar with React and modern responsive design principles, with foundational knowledge of Node.js, Express, and MongoDB. Seeking an opportunity to grow as a developer, contribute to real-world projects, and continuously improve technical and problem-solving skills within a collaborative team environment.

Education

University: Alexandria University.

(October 2023-Present)

Faculty: Faculty of Computer and Data Science.

Major: Data Science.

GPA: 3.46/4.0

Work Experience

Front-End React Developer Intern

(November 2025- Now)

Digital Egypt Pioneers Initiative (DEPI)

- Developed responsive and interactive user interfaces using React.js
- Built reusable components and managed application state using Hooks
- Integrated REST APIs and handled data fetching and rendering
- Applied HTML, CSS, JavaScript, and Bootstrap to create clean UI designs
- Collaborated with team members using Git/GitHub following agile practice

Extracurricular Activities

Volunteer at Resala Charity Organization

- Participated in Baraem and Mojadidon convoys
- Assisted in organizing and distributing aid bags to families in need.
